

# BREAKTHROUGH TECHNOLOGY

Hitting a straight putt isn't easy. On a 15 footer, a ball hit just half an inch off-center will travel about 6" off line and 5% shorter. That slight miss-hit is a missed putt!

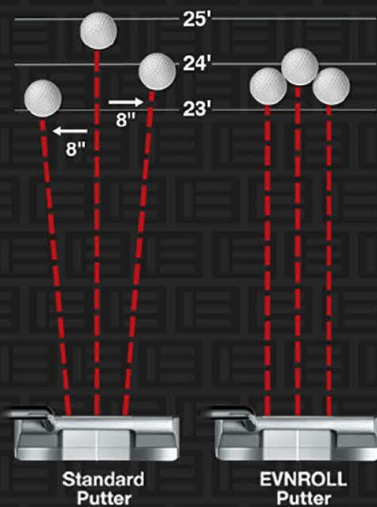

Introducing Evnroll®. Precise patented face milling imparts progressively more energy transfer on off-center hits to roll the ball a consistent distance with every stroke.

This unique milling pattern also gears the ball back to the center. So you can roll your putts the same distance to the same spot. Sweet.

## Eliminate Miss Hits

The result is that the ball rolls virtually the same distance from center and off-center hits, meaning that Evnroll putters deliver unprecedented accuracy. That's why it's called "Sweet Face Technology."
