MAT SYSTEMS

Hitting systems provide an upgraded experience over a traditional hitting mat. The hard-wearing nylon stance mats have a soft foam back for comfort and are held in place by the click-together rubber base.

Tee line turf hitting strips also drop into the base and provide the closest experience to hitting off the grass. Hitting strips accept a wooden tee so you can always adjust to the right tee height. Rotate the front of the hitting strip to back to extend life. When they wear out a replacement strip saves hundreds of dollars over the cost of a full hitting mat.

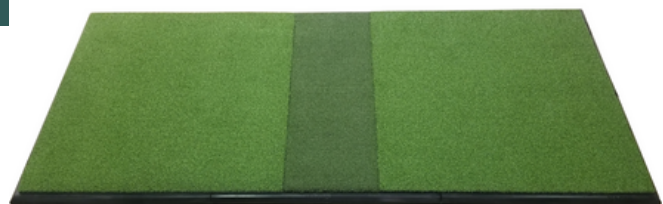

In use at driving ranges across the country, these can be used indoors and outside.

GSH/NAGIC Full Mat Systems

Full mat system includes - base, stance mat and two hitting strips outside dimensions 50" x 74.25" 7 1/8" depth

(fits GSH Center Strike System)

- 1090805

Special Order 24" x 47"
(fits Vers.1 GSH Center Strike System)

- 1090795

INDOOR/OUTDOOR TURF

Indoor golf turf is designed for use inside buildings, typically for practice or simulation purposes. It is typically shorter in pile height and has a smoother surface, allowing for the ball to roll more evenly and predictably.

Outdoor golf turf, on the other hand, is designed for use on traditional golf courses, driving ranges, or other outdoor areas. It is typically longer in pile height and has a more natural appearance, mimicking the texture and look of real grass.

Outdoor golf turf is also designed to be durable and able to withstand the elements such as rain, sun, and wind.

Tee Line Turf

F1 3/8" thick polypropylene yarn. Dense and durable at 152 oz/per/sq/yd. Designed for heavy traffic tee lines. In use at many of the top clubs in North America

1090900

Fringe & Landscape Turf

1 3/4" polypropylene pile height
