pin toppers	72	yardage markers, in ground plates	75
podiums	14-16		

Recycled HDPE

HDPE (High Density Polyethylene) is a composite plastic lumber. Composed of recycled Type 2 plastic, commonly found in milk, soap, and oil containers. The material is not only environmentally friendly, but also very resistant to impact, friction, chemicals, and moisture, making it incredibly durable in a wide array of environments.

Unlike wood that requires frequent maintenance, the HDPE material will last far longer without fading, cracking, chipping, or decaying. Often our clients get 10+ years before seeing any significant fading. HDPE is the perfect all weather material with the least amount of maintenance possible. A light pressure cleaning yearly with a wet rag keeps your furniture looking new for years.

STAINLESS
HARDWARE

Keystone Arch (KA)

Straight Frame (SF)

Style

All units are available in either Keystone Arch or Straight Frame

Structure

We strictly use stainless steel hardware and powder coated screws in order to withstand the elements of coastal environments. In order to minimize and even prevent warping, we add powder coated aluminum bracing to many of our items including tables, benches, chairs, and more.

Color

Our selection of colours that we keep in stock is 10 solid colours and 3 woodgrain finishes. Two-tones are never an additional cost. Other colours including the three special order woodgrains are available for larger orders if time permits.

Premium woodgrains have a small up charge. Minimum order size may apply.

Cast Aluminum or Bronze

Cast logo medallions are available in aluminum or bronze depending on your preference and color scheme. These are traditional styles of branding your logo on to the furniture with a long lasting maintenance free logo. Cast logo's tend to run from 4-8" in size but can be made any size desired.

Vinyl Inlay

We produce these logo's in house on UV treated vinyl for longevity. Once they are installed we add a clear layer of UV resin over top of the vinyl to ensure long life.

Colour Pour

Colour pour works on logo's that are not too intricate where our CNC router is able to route out the image area. We then use a hardened lacquer style paint similar to automotive paint; which is hard as a rock and fade resistant. The result is a clean classic looking logo that can be done in single or multiple colors depending on the logo design.

Standard Range Divider

- * W46"xD2"xH7" with 2 spikes
- * shown in brown, no logo option

GSGRD101

Deluxe Range Divider With Handle

- * W46"xD4"xH7" with single handle
- * shown in premium brazilian walnut/black base, optional cast logo

Metal Cooler Box Inserts

no other manufacturer comes close to the quality of GSD's unique cooler design. our one of a kind boxes are fabricated out of thick aluminum, powder coated with a food grade coating, and insulate the ice far longer than any other brand

the base of the insert tapers to allow full drainage of all left over water for easy cleaning of the units as needed. beneath the pan and out of sight is a brass release fitting allowing you to drain as needed. our metal inserts are encased in 1.5" of hd insulation with an R factor of 6 to extend the ice retention.

hidden brass valve release

tension gas strut allows lid to stay open while in use and a slower close action when shutting.

61 cushion colours and arrangements

We only offer sunbrella fabric, the longest lasting and most water repellent fabric on the market. The material has been engineered to withstand all weather conditions; proven to resist mold and to fight the Sun's UV rays from fading. Not only is Sunbrella's fabric all-weather, it offers easy cleaning with simple soap and water. Choose from our selection of 15 color samples to find an option that best suits you.
